Hosting multiple applications inside a Site in IIS server

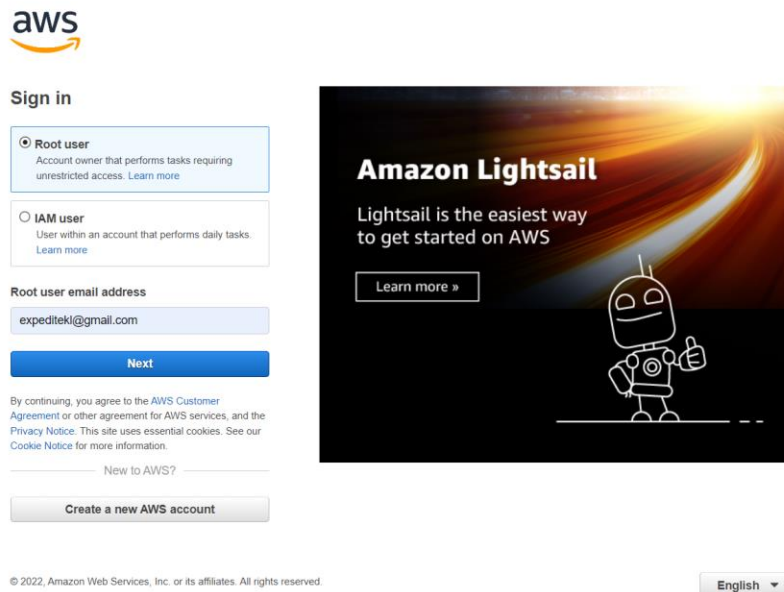

Step-1: Go to Google Browser and type [AWS \(Amazon Web Services\) Management Console](https://aws.amazon.com/console/).

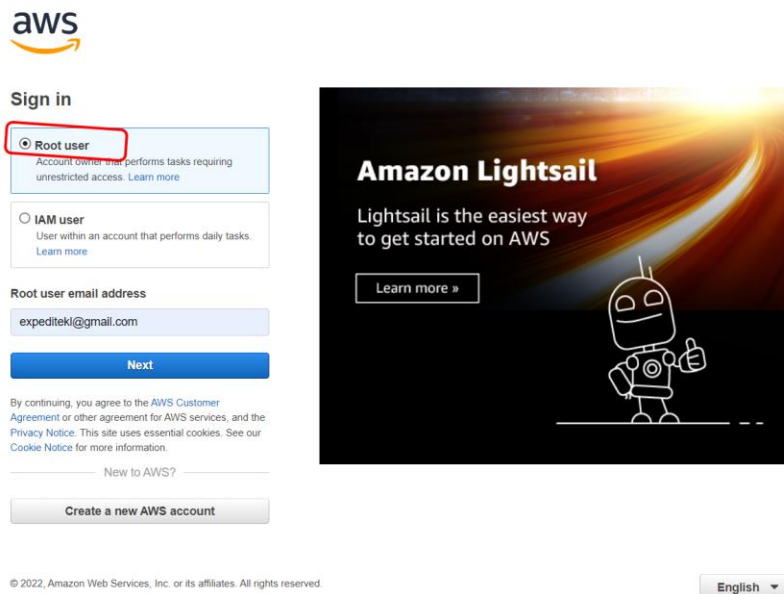

Step-2: After That If you having an account in [Aws management console](#) then click on [Sign-in](#) option.

Step-3: After it will redirect to [aws sign-in](#) portal.

Step-4: Sign-in with your root account only

The image shows the AWS sign-in page. On the left, there's a 'Sign in' section with two options: 'Root user' (selected and highlighted with a red box) and 'IAM user'. Below these is a text field for the 'Root user email address' containing 'expeditekl@gmail.com'. A blue 'Next' button is below the email field. At the bottom of the sign-in section, there's a link for 'New to AWS?' and a button to 'Create a new AWS account'. On the right, there's a large banner for 'Amazon Lightsail' with the text 'Lightsail is the easiest way to get started on AWS' and a 'Learn more »' button. The banner features a stylized robot character.

aws

Sign in

☒ Root user
Account owner who performs tasks requiring unrestricted access. [Learn more](#)

☐ IAM user
User within an account that performs daily tasks. [Learn more](#)

Root user email address

expeditekl@gmail.com

English

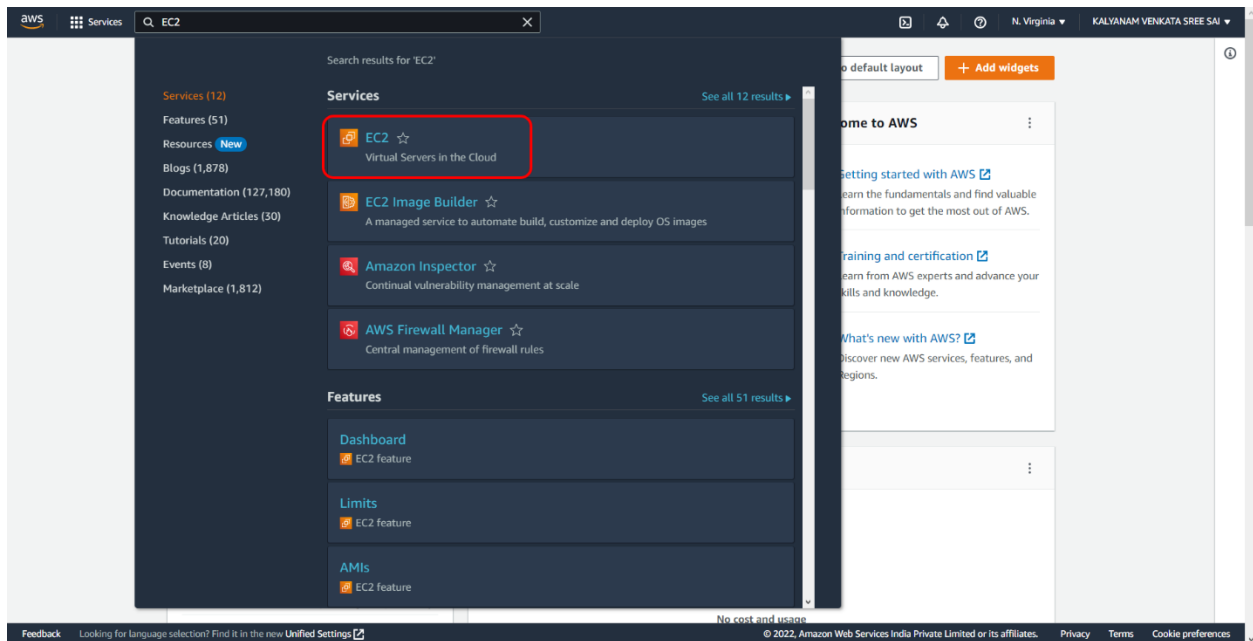

Step-5: After Sign-in the aws management console look like the below image.

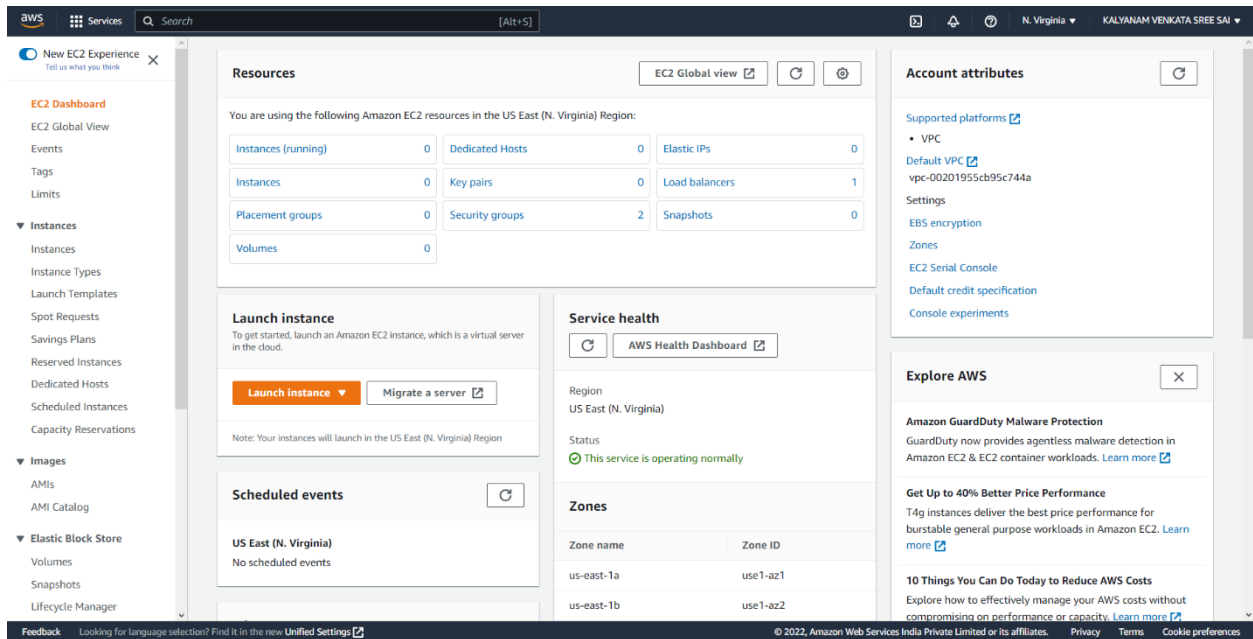

Step-6: Go through the search bar and type “EC2”.

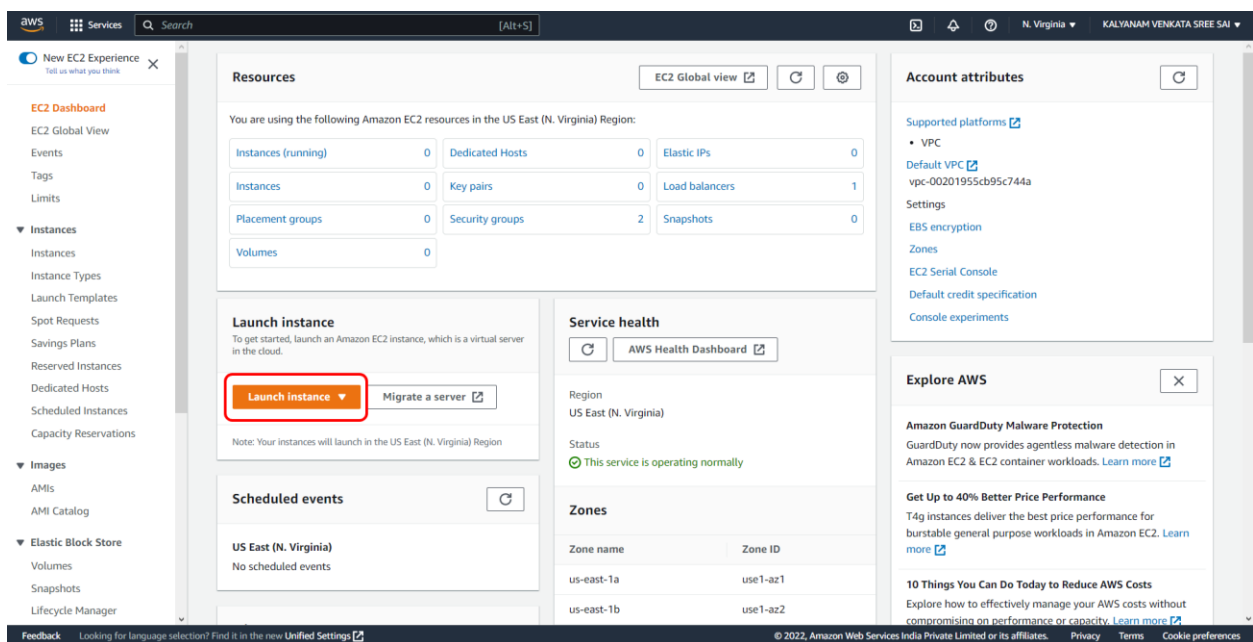

Step-7: Select the First service from the listed below.

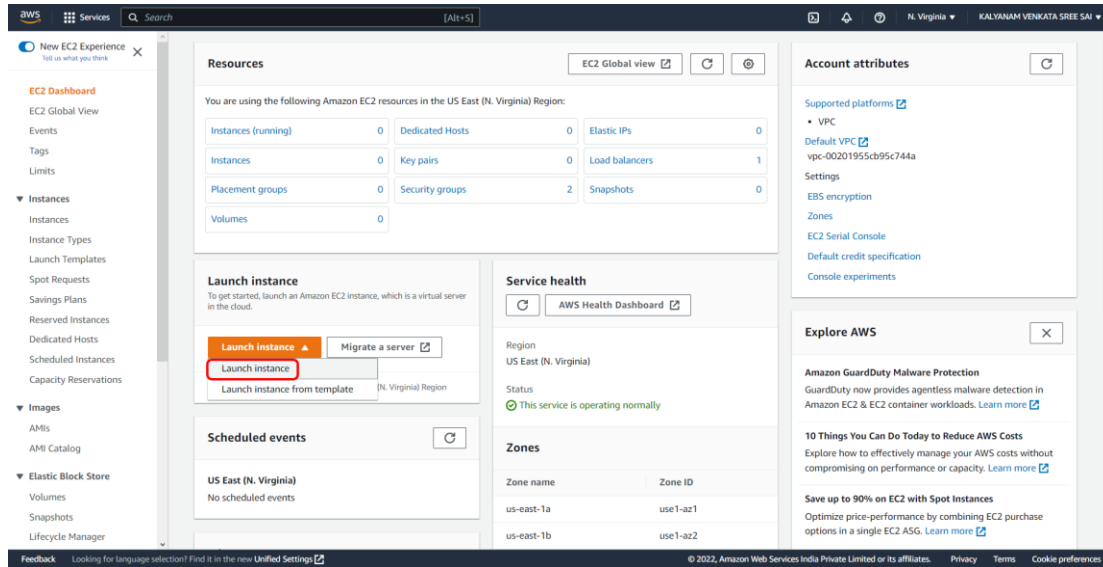

Step-8: After clicking the First Service The console will look like.

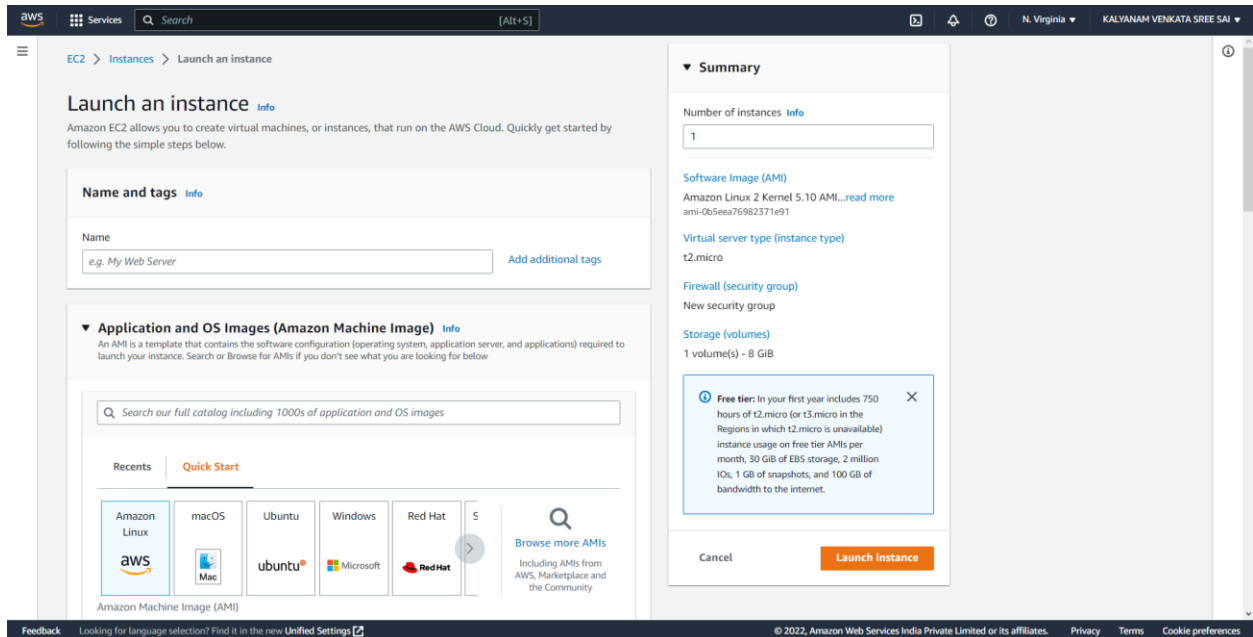

Step-9: Click on the “Launch Instance” in the EC2 console.

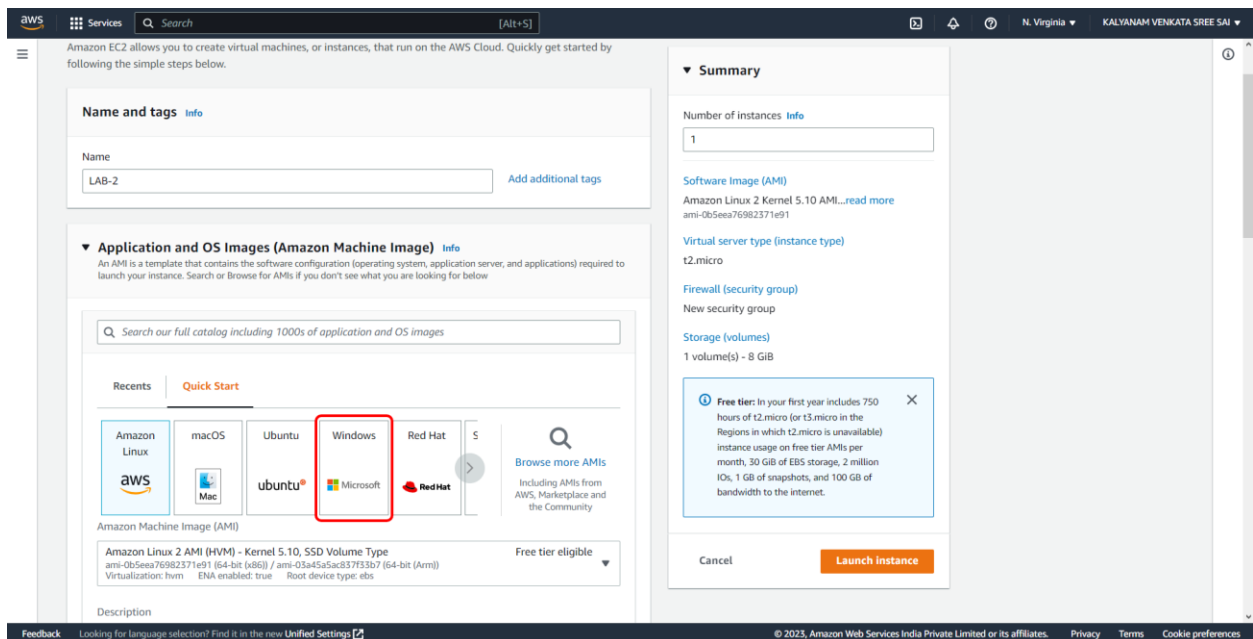

Step-10: Click on the “Launch Instance” from the drop-down menu.

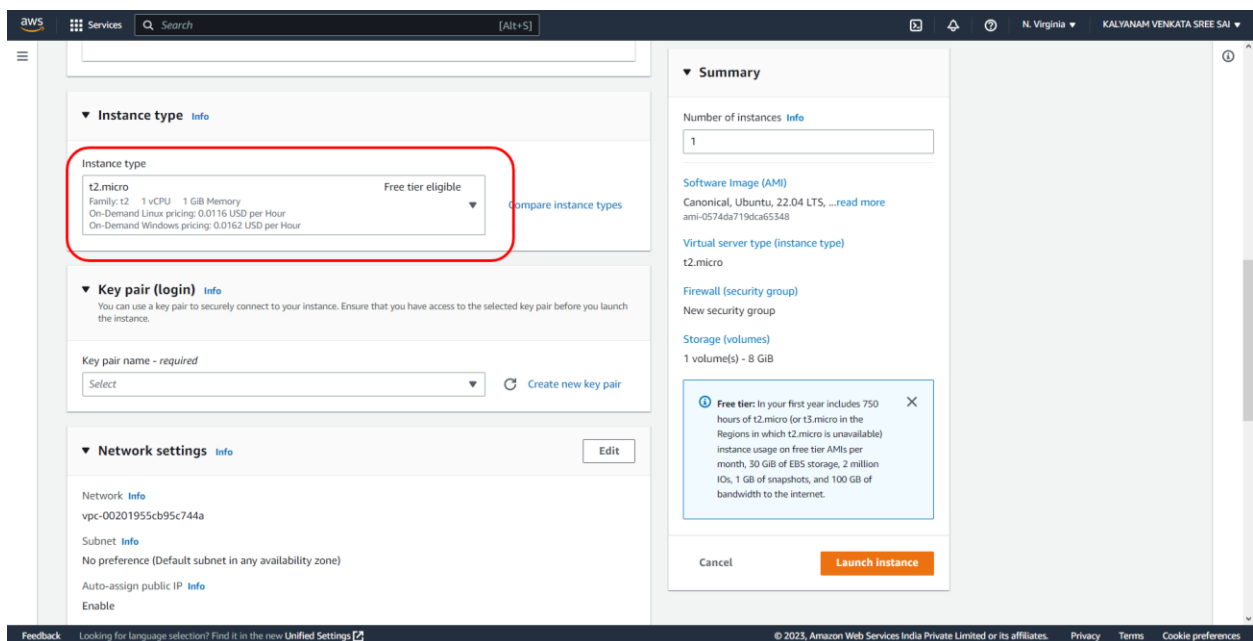

Step-11: After Clicking on the Launch Instance, it will look like.

Step-12: In the AMI Section Select the “Windows”.

Step-13: After select, The Instance Type “t2. micro” which is under free tier eligible.

Step-14: Use the existing key pair for creating The “Windows Ec2 Instance” to connecting “RDP”.

Instance type Info

Instance type: **t2.micro** (Family: t2, 1 vCPU, 1 GiB Memory) Free tier eligible [Compare instance types](#)

On-Demand Linux pricing: 0.0116 USD per Hour
On-Demand Windows pricing: 0.0162 USD per Hour

Key pair (login) Info

You can use a key pair to securely connect to your instance. Ensure that you have access to the selected key pair before you launch the instance.

Key pair name - required: **key-pair-lab01** [Create new key pair](#)

For Windows instances, you use a key pair to decrypt the administrator password. You then use the decrypted password to connect to your instance.

Network settings Info [Edit](#)

Network: **vpc-00201955cb95c744a**
Subnet: **No preference (Default subnet in any availability zone)**
Auto-assign public IP: **Info**

Summary

Results

Select one or more roles to install on the selected server.

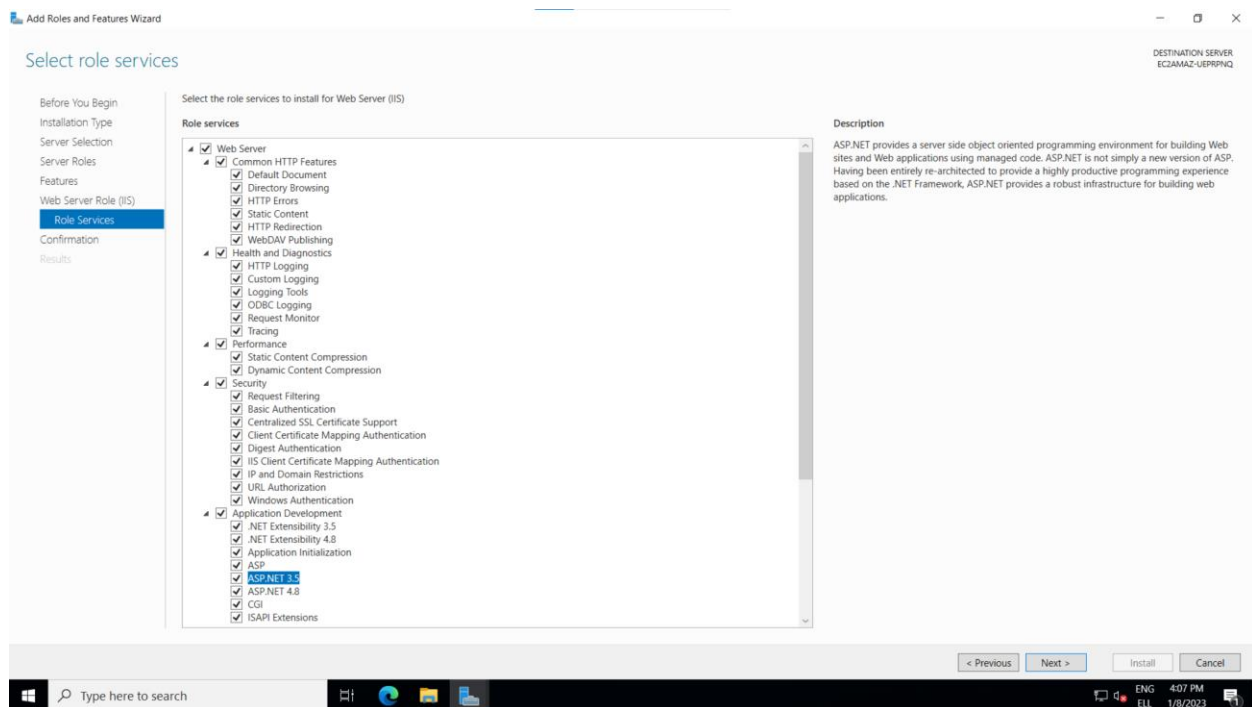

Roles

- ☐ Active Directory Certificate Services
- ☐ Active Directory Domain Services
- ☐ Active Directory Federation Services
- ☐ Active Directory Lightweight Directory Services
- ☐ Active Directory Rights Management Services
- ☐ Device Health Attestation
- ☐ DHCP Server
- ☐ DNS Server
- ☐ Fax Server
- ☒ File and Storage Services (1 of 12 installed)
- ☐ Host Guardian Service
- ☐ Hyper-V
- ☐ Network Controller
- ☐ Network Policy and Access Services
- ☐ Print and Document Services
- ☐ Remote Access
- ☐ Remote Desktop Services
- ☐ Volume Activation Services
- ☒ **Web Server (IIS)**
- ☐ Windows Deployment Services
- ☐ Windows Server Update Services

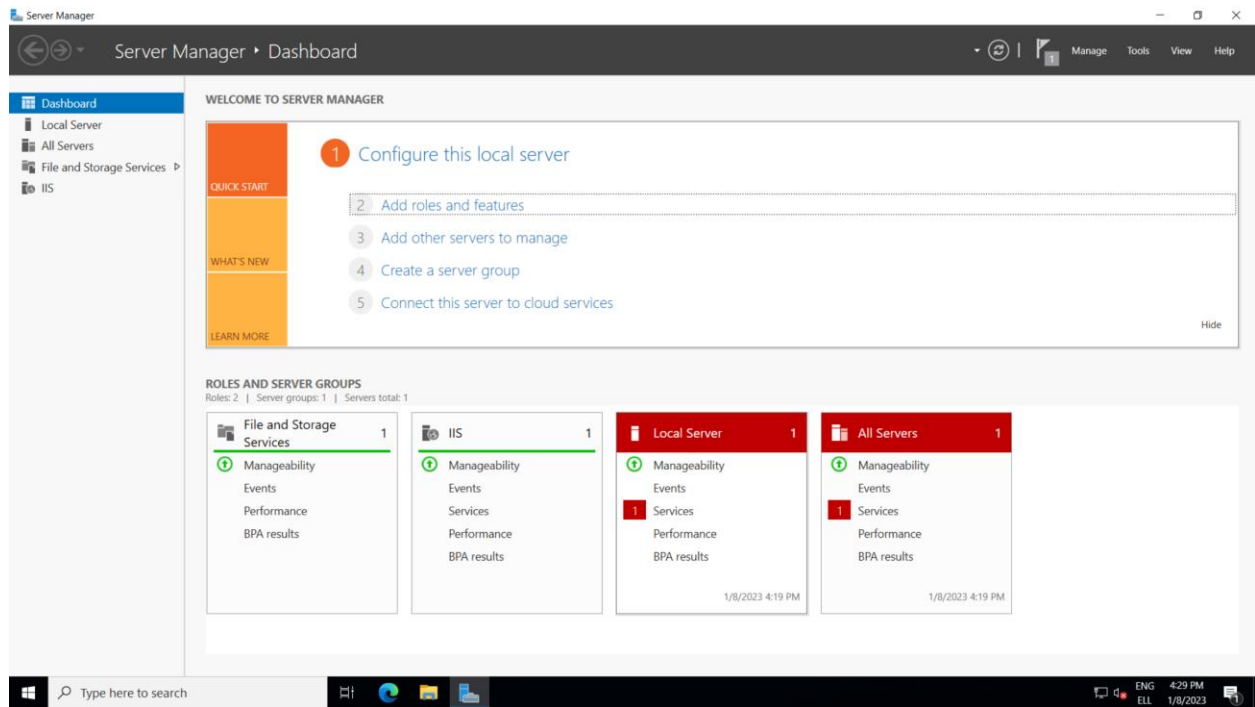

Step-27: In features select “Net Framework 3.5 Feature”

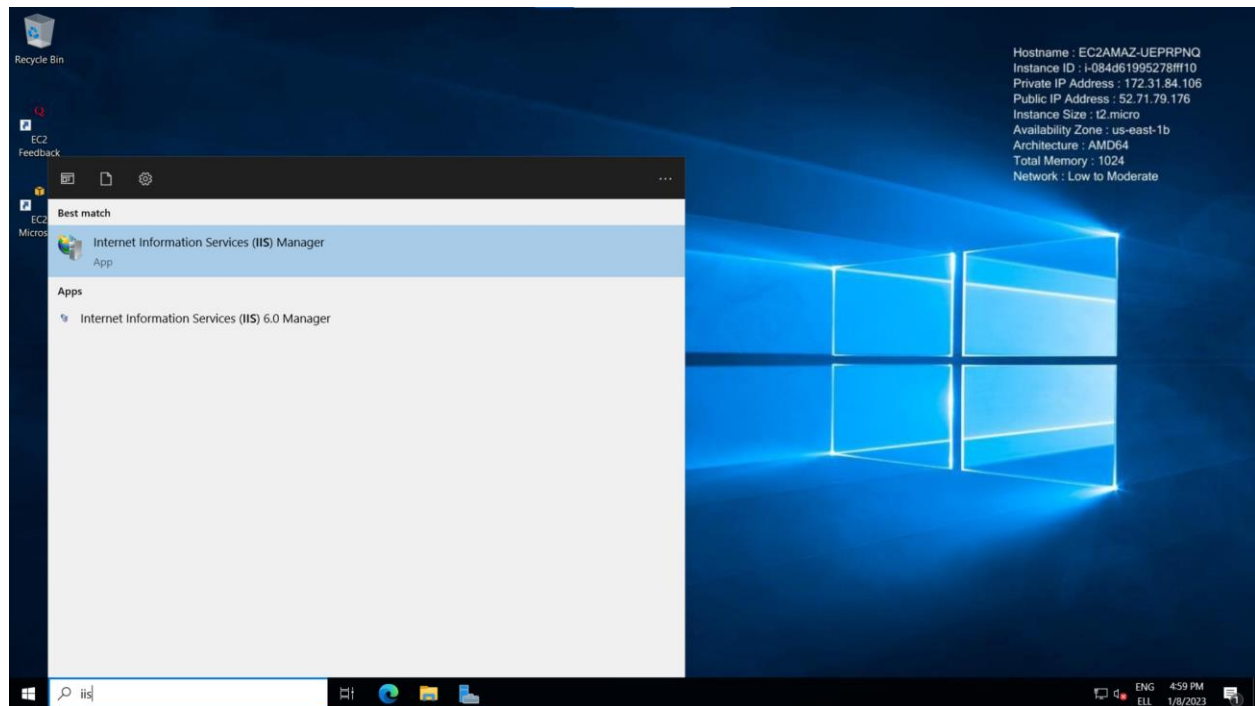

Step-28: In the Roles Services select all the services.

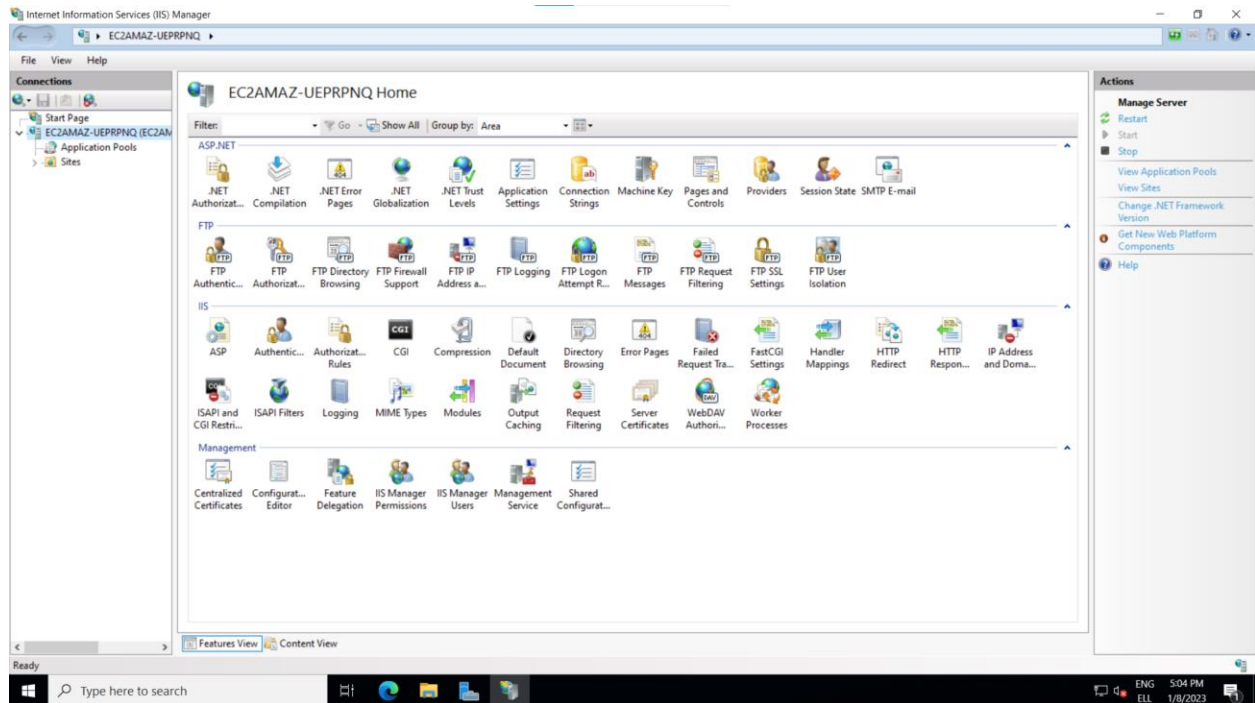

Step-29: We finally installed IIS server in windows Ec2 Instance.

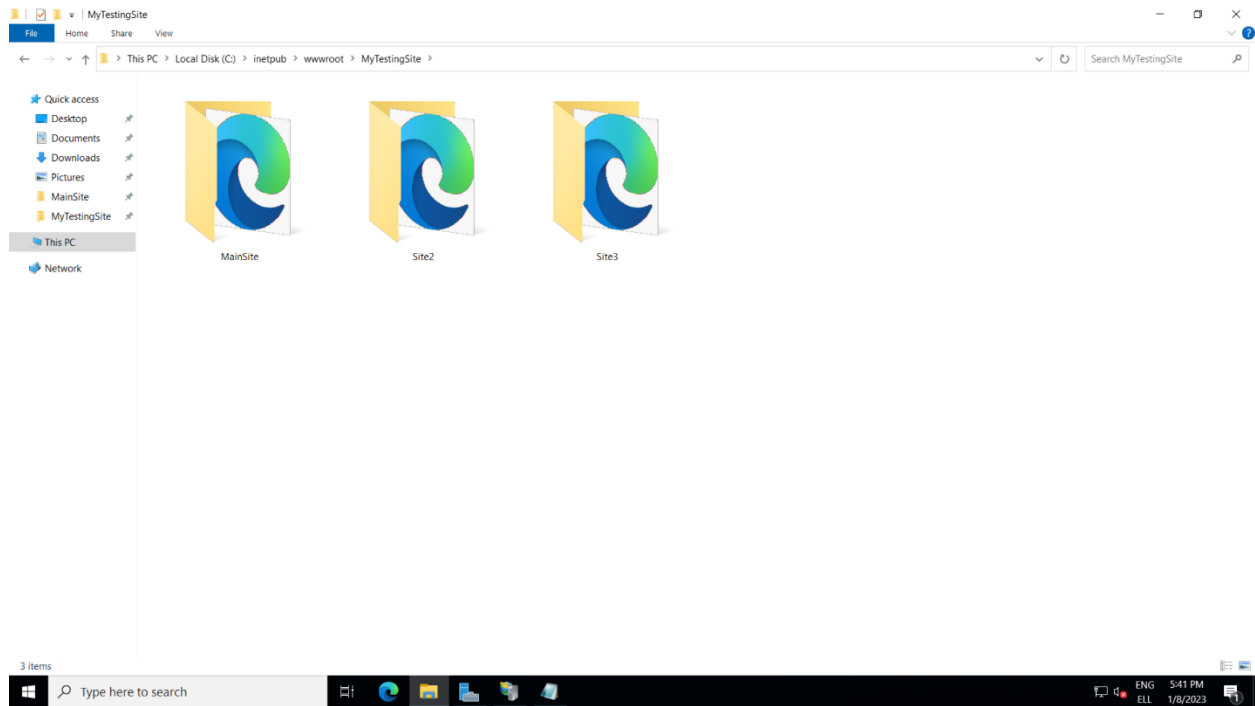

Step-30: After Successfully Installed IIS go to the IIS portal.

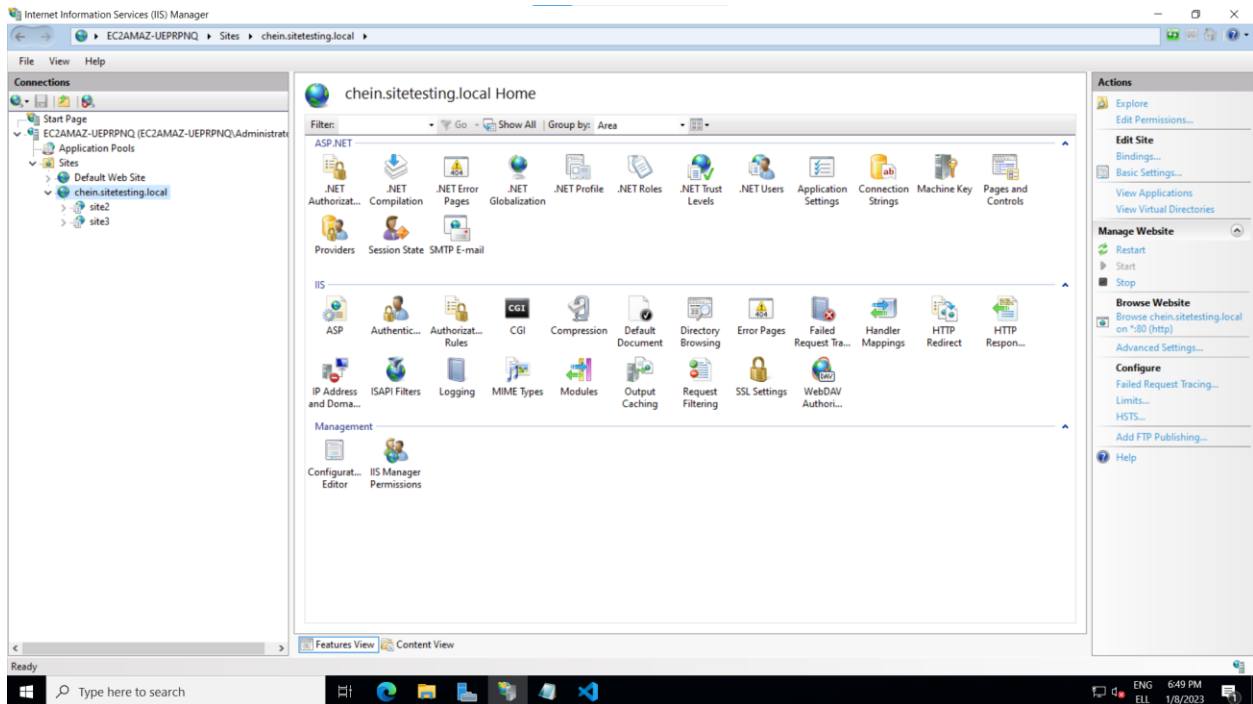

Step-31: Go to the “C:\inetpub\wwwroot” Create the folder “MyTestingSite” in that Create the 3 folders with “MainSite”, “Site2”, “Site3” with html files in these 3 folders.

Step-32: Go to IIS Portal →Connections→Sites.

Step-33: After Sites→Add Websites in that add applications.

Step-34: Finally we successfully hosted multiple applications using IIS server in EC2 Instance.
